

WisDOT Civil Rights Compliance System
Electronic payrolls
2013 Training Schedule

Training may be scheduled at nearly any time and place, provided a training facility and instructor are available. We can often accept registrations as late as two afternoons before training. Please call Tess at 608 267 4489 to have materials prepared for your participation.

Who should take full payroll training? Anyone wanting a refresher of material or who isn't confident of their computer skills.

Who should take updating payrolls training? Anyone wanting to learn more system functionality. Units include sublets, crafts, wage rates, and other system messages. It is suggested you not combine the two classes unless you are already familiar with the software.

Both classes are free.
